

Assignment Report

Public IP Address: 54.211.240.229

Task 1: Created an Ubuntu EC2 instance, configured the Security Group, allowed ports 22 and 80, and connected using SSH.

Task 2: Updated packages, installed Nginx, verified service status, restarted Nginx, and checked disk, memory, and processes.

Task 3: Hosted a simple HTML website on the EC2 instance.

Task 4: Uploaded the project to GitHub.

Task 5: Documented AWS services, Linux commands, problems faced, learnings, and time taken.

Conclusion: Successfully completed the assignment.
